Chapter 1

Introduction

This report contains the data collected from the parents of the students in your school(s) using the ***Parent Engagement and Perception Survey***.

The following chapters contain your survey results in tabular form. Each table corresponds to an item on the questionnaire. The tables contain percentage data broken down by the children's grade levels, and all grades combined. The grade *NA* is for the parents who did not indicate a grade level for their child. The *N of Valid* row contains the number of parents who responded to the question and the *N of Missing* row contains the number of parents who did not respond to the question. If n-sizes are low it may be more useful to concentrate on the combined grades or Total column rather than looking at each grade level.

The percentage tables of the report appear in the same order as corresponding questions on the questionnaire. The Table of Contents contains the percentage tables by section and gives the page number where each section is located. The List of Tables contains the location of each individual table. This report can be used in conjunction with the interactive, password protected, Dashboard Report found at <http://dashboard.pridesurveys.com>.
